# McAfee

McAfee is one of the world's leading independent cybersecurity companies.

## Core offerings:

### Products

- Advanced threat analytics
- Data protection and encryption
- Endpoint protection
- Network security

- Database security
- Security management
- Server security
- SIEM
- Web security

### Solutions

- Data centre and cloud defence
- Dynamic end-point threat defence
- Pervasive data protection
- Intelligent security operations

### Professional Services

- Security training, assessments, consulting, and solution deployment

**Founded in:** 1987

**Corporate HQ:** Santa Clara, CA, USA

**Office locations in the MEA:** UAE, South Africa

## Latest buzz:

A few weeks after launching as a standalone company, McAfee announced it will increase investments and resources in cyber threat research. As a proof point of this commitment, McAfee released evidence that a series of Shamoon malware campaigns targeting Saudi Arabia are the work of one coordinated force of attackers, rather than that of multiple independent renegade hacker groups.
