

BlueMarble BSS for Fiber Solution

Comviva BlueMarble BSS – for Fiber Solution

For Connectivity & Beyond

Highly distributed work environments, upsurge in teleworking, movement of enterprises and applications to the cloud, and increased bandwidth demand has strengthened fiber as a key element of the communication infrastructure.

Government funding to accelerate fiber-based high-speed internet access, along with rising penetration and deployment of 5G mobility will further increase the demand for high bandwidth backhaul connections.

To build and extend state-of-the-art digital services over high performance networks, fiber companies need an agile, flexible and extensible Business Support System Solution that enables them to create new propositions quickly, automate the ordering and deployment, and providing self-service capabilities to its customers.

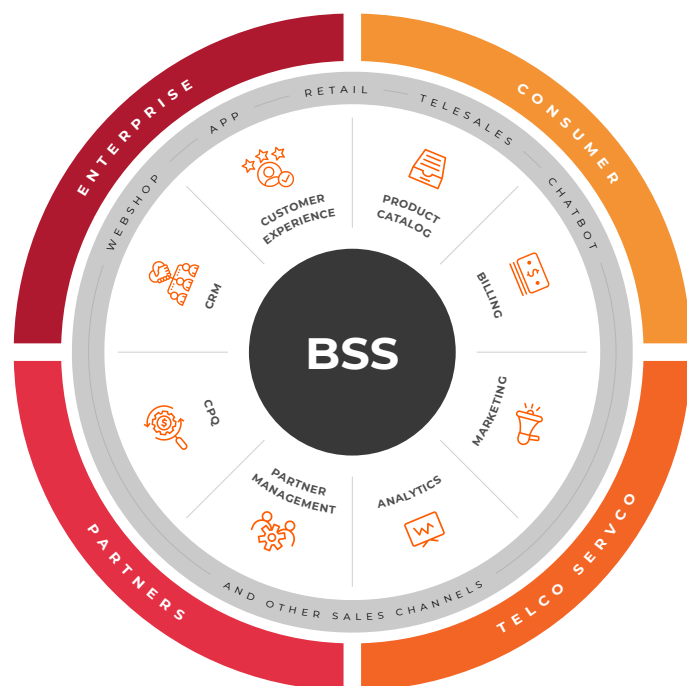

Introducing BlueMarble BSS for Fiber

A cloud-native, microservices-based, business-oriented platform delivering consistent BSS capabilities for wholesale fiber business. It enables modernization of customer engagement channels, revenue management procedures, order orchestration & fulfilment, as well as analytical decision-making using AI/ML in the customer service & assurance domains.

Why BlueMarble

Accelerate time to market with pre-configured out-of-the box products and business processes for fiber business model.

- Modular product platform with cost-effective, cloud-based deployment
- Gain operational efficiency by rapidly launching new models with our experienced product design and delivery excellence.
- Single platform to support a comprehensive portfolio of services, beyond connectivity (IP voice, and hardware), supporting retail and wholesale line of businesses.
- Accelerate Monetization, by enabling new revenue streams beyond connectivity through Zero touch partnering approach.
- Simplify scalability with Fully compliant TM Forum Open APIs and ODA framework.

BlueMarble BSS for wholesale fiberco

KEY FIBER OFFERINGS:

How BlueMarble Delivers Value

BlueMarble Compact BSS adopts a consolidated and convergent design which significantly reduces the TCO (Total Cost of Ownership) and O&M costs. Our Compact BSS solution helps operators rapidly launch new business models by defining all types of product definitions in a single catalog, with ability for further modification for different product families like dark fiber, data center and mobile service

It enables the synchronization of products & offers across sales channels using the commercial product catalog APIs and dynamic rules, thereby improving customer experience, while preventing fragmentation and asymmetry between product, service & resource (PSR) components across different products.

Our CRM is used to onboard ISP/RSP with a 360-degree view across the entire lifecycle of the customer. CPQ further enables quote generation for opportunities created via CRM with a service fulfillment option using last mile details.

FUNCTIONAL ARCHITECTURE

About Comviva

Comviva is changing the world through digital experiences. Our innovative portfolio of digital solutions and platforms bring greater choice, faster time to market and flexibility, to better meet the evolving needs of our customers as they drive growth, transform and bring efficiency. From maximizing customer lifetime value to enabling large scale digital transformation, we partner globally with organizations in the communications and financial industry to solve problems fast and transform for tomorrow.
